

# GLOBAL TRAINEE PROGRAM - For students and fresh graduates

The Global Trainee Program in department of Technical Support is a great opportunity for students or high school and college graduates in the field focusing on electronics, who are interested in being part of a world-renowned company. Based on the rotation in the individual departments of the company (technical support, product management, project office, SW and HW development), you will find out what attracts you the most and you will start your career in the right direction.

## What we expect from you:

- Education in the field of electrical engineering
- Interest in control systems, automation, communications, and new technologies
- The desire to come up with new ideas and implement them
- Ability to work in a team, but also independently
- Communicative knowledge of English
- Passion for discovery our company and products 😊

## What we offer:

- Opportunity to work both full-time and part-time in order to establish long-term cooperation after the end of the Trainee program
- Possibility to get acquainted with all positions that may be of interest to you in the future (especially with a technical focus)
- Chance to see the world - travel to on sites projects, long or short time stay
- Work in a friendly atmosphere with lots of young people (many of them started at school like you)
- Arrival by appointment at any time during the year, appropriate salary evaluation, other benefits, and the opportunity to participate in all corporate events
- In addition, you will be able to work in a modern building with relaxation zones with the opportunity to escape into virtual reality when you want to relax
- Possibility of partial work from home in agreement with the manager
- Interested? Click the [‘Apply’ button](#) and attach your resume and covering letter. In your application, please outline how you meet the requirements listed above.
